

PureLink iSeries

USB-C: The Next Generation of Connectivity is Here

The high-quality USB-C adapters of the iSeries are specifically designed for the enhancement of new computers, mobile devices and peripherals. Already, the newest generations of devices are much lighter and slimmer than ever before. And this trend will continue unabated in the future so that more and more devices will be equipped solely with the new

USB-C port. For a continuing experience of full connectivity, by now adaptors from USB-C to other interfaces have become indispensable. The iSeries' complete product range enables the charging of devices, data transfer and direct connection to digital or analogue displays, as well as other advanced functions for mobile devices.

Full Product Range

The iSeries offers products with any current interface for all signal types.

Enhanced Connectivity

Simply add HDMI, DisplayPort, VGA or RJ45 connectors to USB-C™ enabled devices.

Universal and Future-Proof

All major technology companies are using USB-C. As a result, mobile devices will soon be compatible with all types of accessories.

Greater User-Friendliness

The new USB-C plug can be used both-sidedly which makes daily use more convenient.

High Quality

Premium connectors made of glossy ABS synthetic material complement modern electronics for signals up to 4K.

Retail Packaging

The packaging impresses with its attractive design at every point-of-sale, provides the highest product protection and is stock-optimised.
